Rehabilitation and Maintenance Services and Project Services

SAFETY

Our workforce is our most important asset. Through our commitment to safety excellence, we endeavour to provide a safe and healthy work environment for our employees.

PROACTIVE COMMUNICATION

We have developed policies and procedures designed to foster a safe and productive work environment. Training programs, at all levels, teach our employees that constant communication prevents accidents and sustains project momentum.

QUALIFIED PERSONNEL

We employ experienced supervisors and foremen who are knowledgeable about safe work practices and proper workplace conduct.

CONTINUING TRAINING

With a fully-integrated new-hire training/orientation program, we are committed to providing professional development and continued safety education for our contractors and subcontractors, followed-up with annual safety reviews.

INSURANCE

Dimension Energy Services maintains a comprehensive insurance program that includes:

- Liability Insurance
- Builders Risk
- Workers Compensation
- Professional and Pollution Liability

AFFILIATIONS

ABOUT DIMENSION ENERGY SERVICES

Integrated services under the Pipeline Safety Act and Clean Air Act for our customers covering inspection, compliance, rehabilitation and maintenance of existing energy assets and construction services for discrete projects to support the growth of the energy industry. Our offerings are:

Inspection and Prevention Services
Compliance Services to meet Government (federal, state and local) Mandates
Corrosion Control and Specialty Products
Control Systems and Instrumentation
Environmental Engineering and Permitting
Measurement Services

Right-of-Way Maintenance Services to address current and Anticipated Regulations
Speciality Crafts
Maintenance Services
Power & Mechanical Services
Land & Soil Remediation
Full Roustabout Services

Construction Management Services
Project Management
Procurement
Industrial Projects
Pipelines and Facilities
Terminals
Natural Gas Compression

INTEGRITY

Our Integrity Services cover traditional field inspection services with analytical services to provide an integrated service offering for asset reliability.

CORROSION INSPECTION AND PREVENTION

INSPECTION SERVICES

- Run Design, Pig Selection, Assistance
- In-line Inspection
- Analysis Review
- Mitigation Program Design and Rehabilitation
- AC Mitigation
- Locating
- GIS Surveys and Mapping
- Corrosion
- Class Review; Encroachment
- One Calls

TESTING AND CALIBRATION

- Hydrostatic or pneumatic
- Cathodic Protection Assessment
- Measurement - Natural Gas and Liquids
- Overpressure Protection

COMPLIANCE TRAINING & EDUCATION

Safety Training, Audits, Manuals and Programs
Operator Qualification Evaluations, Training & Programs
Emergency Response
Public Awareness

ENVIRONMENTAL ENGINEERING

Regulatory Assessment and Compliance
Spill Prevention, Containment and Countermeasures
Storm Pollution Prevention Plans
Air quality Compliance and Permitting
Impact Studies

POWER & MECHANICAL

To Replace Fittings & Valves, Communication Systems, Meters and Controls
Valve Replacement, Piping Repairs, Filter Replacements, Control Recalculations, Insulation Repair

REHABILITATION AND MAINTENANCE

TERMINAL, PLANT & STATION MAINTENANCE, REFURBISHMENT AND REPAIR SERVICES

Dimension Energy Services provides an array of rehabilitation & maintenance services that complement our integrity and project service teams. We offer an integrated solution to our customers to provide efficient, safe and quality personal to assist our clients needs.

We offer a number of services to a wide variety of industries:

Biofuels
Chemical
Food & Beverage
Gas Processing & Compression
Mining

Nuclear
Offshore & Transmission
Power Generation
Pulp & Paper
Refining

Water & Waste Water
Pumping
Terminals
Tank Farms

PLANT, STATION AND ROW MAINTENANCE

Restoration & Reclamation
Blasting & Painting
Pipeline Repair
Anodes, Rectifiers
Coatings
Land & Soil Remediation
Full Roustabout Services

INDUSTRIAL

Preventative Maintenance
Civil and Mechanical Repair and Replacement
Rebuilds
Insulation
Pipe Fitters
Fire Proofing
Heat Tracing
Abatement
Painting/Coating
Scaffolding
Turnaround Services

POWER & MECHANICAL

To Replace Fittings & Valves, Communication Systems, Meters and Controls
Valve Replacement, Piping Repairs, Filter Replacements, Control Recalculations, Insulation Repair
I&E Services

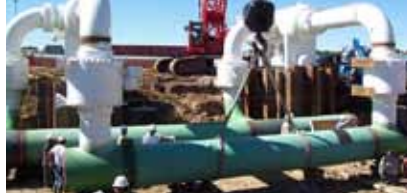

PROJECT SERVICES

Our construction team complements our integrity management and rehabilitation services. When we construct a facility or pipeline, we build it with an owners viewpoint. We often are asked to sole source projects to control costs and preserve quality. We often make recommendations that improve future operating costs & efficiencies.

Our team is dedicated to safety and constructing a quality asset for our clients.

We offer full engineering, procurement and construction (“EPC”) services through our alliances with several large fully integrated engineering firms. With these relationships, we are able to offer full engineering, procurement, construction, fabrication and material management. Our goal is to deliver safe, efficiently managed and cost-effective projects that meet your requirements. Capabilities include economic analyses, feasibility studies, process design, front-end and detail engineering, project engineering and construction engineering. We offer a wide range of disciplines, including civil/structural, geotechnical, electrical, instrumentation and controls, mechanical, piping and process engineering.

INDUSTRIAL

Engineering, Procurement and Construction
("EPC")

Project Management

Specialty Craft Staffing

Terminals

Pipe Fabrication

Civil Construction

I&E

Engineering

FACILITIES

Meter Stations

Compression & Pump Stations

Liquid Handling Facilities

Amine, Dehydration and Cryogenic Plant
Construction

Terminals

Tank Farms

Power Plants

PIPELINE

Pipeline Projects up to 24"

Gathering Lines

Laterals, Tie-ins, Extensions and Additions

Gas Distribution Pipelines

Relocation

PROJECT FACILITIES

- Installation of major meter stations
- Compressor station construction
- Upgrade of compressor and pump stations
- Installation of grassroots compressor and pump stations
- Installation of storage facilities
- Revamp LNG facilities
- LNG Plant modification and construction

PROJECT PIPELINE

- Trenching and directional boring
- Custom fabrication
- Large diameter steel
- Deep excavations
- Hydrostatic testing
- Cathodic protection
- Hot tapping and stoppling

INSPECTION

Our personnel utilize proven state of the art inspection methods and equipment to serve our clients needs. We provide inspectors for the following areas:

PIPELINES

- Field Fabrication
- Welder Testing /Ins
- Construction
- Excavation
- Pigging
- Magnetic Particle Exams
- Guided Wave Exams

INDUSTRIAL

- Mechanical
- Structural Fabrication (AWS)
- Valves & Assemblies (ANSI, ASTM, ASME)
- Coatings & Linings
- Pressure Vessels

CORROSION

- Nace Certified
- Coatings & Linings
- Integrity Digs
- In-line Inspections
- Ultrasonic
- Hydrostatic Testing

PRODUCTS

HYDRAWRAP

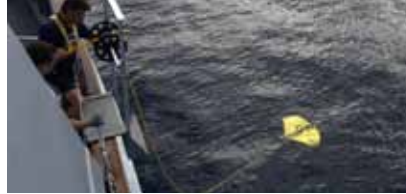

An engineered carbon fiber alternative to pipe clamps or pipe replacements

Cost Competitive Long-term Solution

Can be applied to Interior or Exterior of Pipelines, Tanks, Vessels, Structures, Pylons

Flexible Application

Subsea, Inland Waterways and Tank Applications

NOVA RAY

Underwater Inspection Device

Limit of 1000 ft.

Forward & Side Scan Sonar

Maneuverable up to 9 knots

Fast to Deploy

CONTROL CENTER

Independent Control & Monitoring Center

State of the Art Technology

Leak Detection

Flow, Pressure & Production Monitoring Measurement

Remote Actuators

OWNERSHIP

A.G. Hill Partners, LLC is a diversified investment company located in Dallas, Texas, that actively invests in private equity, real estate, liquid securities and oil and gas investments.

A.G. Hill Partners invests in a number of private equity interests through its Galatyn Private Equity subsidiary. Galatyn Private Equity partners with proven managers seeking capital to grow or recapitalize their businesses. The principals of Galatyn Private Equity have each run businesses successfully prior to joining the company and understand that operational issues arise after an investment has been made. Galatyn is looking to build meaningful businesses and, because there are no outside investors, can be a patient investor.

MANAGEMENT

Tim Nesler – *President & Chief Executive Officer*

Mr. Nesler is a senior business executive with 35 years of expertise in the global energy business. Prior to joining Dimension, he was the Founder, Chairman and CEO of Energy Maintenance Services (EMS), a pipeline maintenance services company that grew rapidly, acquired twenty-four businesses and established a Moody's investment grade credit rating under his leadership. Prior to founding EMS, Mr. Nesler worked for 25 years in various positions for Marathon Oil Company and its affiliates, most recently serving as President of Marathon Power Company. He serves on the Board of Trustees of the University of Findlay and formerly served on the Board of Directors and as Chairman of the Audit Committee of Opal Energy Corp., a Canadian publicly traded corporation. He also served on the Board of Directors of the Phillips Companies and TWP Inc. until they were each successfully sold. Mr. Nesler has a BS in Accounting, Finance and Economics from the University of Findlay and an Executive MBA from Houston Baptist University. Mr. Nesler is a Certified Public Accountant and a Chartered Global Management-Accountant.

Sumner (Buzz) White – *Executive Vice President – Development and Technical Services*

Mr. White is a senior executive with nearly 40 years of broad experience in energy, engineering, infrastructure development, operations and maintenance management in industrial, institutional and utility environments. Prior to joining Dimension, Mr. White was a Co-Founder and the initial COO of Energy Maintenance Services Group (EMS) and later became the President of EMS LNG and Power Services, LLC, a subsidiary of EMS specifically formed to expand EMS's service lines into the LNG and power sectors. Mr. White also served as an Independent Energy Consultant to Marathon Oil Company during 2002 and 2003 and as a subcontractor to Navigant Consulting, Inc. from 2001-2002. Mr. White has a BS in Mathematics from the University of Chicago, an MS in Applied Mathematics from the University of Illinois at Chicago and an MS in Energy Engineering from the University of Illinois at Chicago.
